Cylinder Cast Wrapping Film

# MM-CC Series Colour Change Wrapping Film

**MM-CC Series** is a proven and highly effective full, or partial, vehicle wrap solution. This range enables a vehicle colour change without under-going expensive resprays and helps transform and customise a range of vehicles, including fleet and commercial.

**MM-CC Series** provides a non-permanent wrap solution, with clean and trouble-free application, along with minimal residue on removal. It is manufactured with a 100 micron film giving high abrasion resistance.

**MM-CC Series** comes in a wide range of colours, and special colour matches can be offered for projects such as fleet branding.

## Why choose to colour change?

- Quick and cost-effective way to transform vehicles.
- Reversible, the film can be removed cleanly.
- Protection of original vehicle paintwork from sun and mild abrasions.
- Preserves the market resale of vehicles.
- Flawless finish is achieved as the conformable film reacts to all vehicle lines, curves, rivets and corrugations.
- Engineered for trouble-free application.

## Adhesive Technologies

MM-CC Series is available with the choice of two adhesive technologies, designed to optimise ease of handling.

### MM-CC Series

**MetaScape®** adhesive offers faster, trouble-free application of larger areas, for flat or curved surfaces. MetaScape® is suitable for dry application methods, resulting in a durable wrap that is ready much sooner after installation.

### MM-CCG Series

**MetaGlide®** micro-channel adhesive offers both enhanced repositionability and a high final adhesion. This allows quicker and easier installation particularly on larger panels. Suitable for dry application methods.
